WORK EXPERIENCE

IT Intern – Operations & Administration Department <i>Philippine Relief and Development Services (PHILRADS)</i>	<i>Quezon City</i> Feb 2026 – May 2026
- Designed, built, and deployed two full production web systems actively used by the organization. - Collaborated with supervisors and staff to gather requirements, conduct testing, and iterate on system features. - Completed a intensive 462-hour on-the-job training program, collaborating directly with stakeholders to design, build, and deploy two production web systems.	
Administrative Support & Community Outreach – Government Internship Program (GIP) <i>Department of Labor and Employment - (DOLE)</i>	<i>Virac</i> May 2020 – Nov 2023
- Handled data entry, document preparation, correspondence management, and compliance reporting. - Managed multiple deadlines in a fast-paced environment, streamlining workflows and improving efficiency.	

EDUCATION

BS Information Systems <i>Catanduanes State University</i>	Aug 2022 – June 2026
---	----------------------

PROJECT EXPERIENCE

MULTIMEDIA & DIGITAL CONTENT <i>Video/Photo Editing & Short Film Production</i>	(2019 – Present)
- Video Production: Produced and edited short films over 5+ years, managing end-to-end post-production (transitions, audio, and effects) using CapCut and other related apps. - Photography: Proficient in Adobe Lightroom for professional color correction, photo enhancement, and batch processing.	
PRDS Inventory Management System (IMS) <i>Technologies: PHP 8.1, MySQL, JavaScript, Apache — Built during OJT at PHILRADS</i>	March 2026
- Full-stack donation & release tracker for a relief NGO with FEFO batch deduction, dual-admin approval workflow, and 5 permission roles — featuring 5 distinct permission roles and over 30 REST API endpoints. - Built a secure activity history log with IP tracking to prevent unauthorized data changes and ensure transparency.	
PHILRADS Asset Database System <i>Technologies: PHP, Bootstrap, JavaScript — Built during OJT at PHILRADS</i>	Feb 2026
- Web-based asset tracker with maintenance logs, staff approval workflow, QR code labeling, and role access tiers. - Generated easy-to-read inventory and depreciation reports with simple CSV export options for the management team.	
KIDDY TRACK – Lead Programmer <i>Web-Based System for Streamlining Student Academic Performance for Teacher & Parent Monitoring</i> <i>Technologies: PHP, MySQL, HTML, CSS, JavaScript, Python</i>	Aug 2023 – June 2026
- Led full-stack development: database schema, teacher/parent dashboards, and academic data reporting modules. - Applied systems analysis principles; implemented secure, role-based monitoring for educational stakeholders.	

CERTIFICATES, SKILLS & INTEREST

Technical Skills:
- Web Development & Databases: PHP, JavaScript, HTML5, CSS3, Bootstrap, MySQL, Apache, Python - Data & Analytics: Power BI (Data Visualization, Dashboard Design) - Core Competencies: Systems Analysis, Requirements Gathering, Technical Documentation, Data Entry & Reporting - Creative Software: Adobe Lightroom, CapCut (Video & Photo Post-Production)
