PROFESSIONAL SUMMARY

Results-driven BS Information Systems graduate with 2+ years of hands-on experience creating and launching practical, user-friendly web applications. A reliable professional who is comfortable managing projects from start to finish—from talking with users to gather requirements all the way to launching the final live system. Demonstrated ability to deliver real-world business value by building and successfully deploying two live management systems for PHILRADS that handle inventory, asset tracking, smart expiration logic, and secure approval workflows with clear activity tracking. spearheaded an academic tracking system from its initial design to full launch.

WORK HISTORY

IT Intern – Operations & Administration Department Feb 2026 – May 2026

Philippine Relief and Development Services (PHILRADS), Quezon City

- Designed, built, and deployed two full production web systems actively used by the organization.
- Collaborated with supervisors and staff to gather requirements, conduct testing, and iterate on system features.
- Completed 462 hours of on-the-job training under the Operations and Administration Department.

Administrative Support & Community Outreach – Government Internship Program (GIP) May 2020 – Nov 2023

Provincial Government Office, Virac

- Handled data entry, document preparation, correspondence management, and compliance reporting.
- Managed multiple deadlines in a fast-paced environment, streamlining workflows and improving efficiency.

PROJECT HISTORY

PRDS Inventory Management System (IMS) March 2026

Technologies: PHP 8.1, MySQL, JavaScript, Apache — Built during OJT at PHILRADS

- Full-stack donation & release tracker for a relief NGO with FEFO batch deduction, dual-admin approval workflow, and 5 permission roles — featuring 5 distinct permission roles and over 30 REST API endpoints.
- Built a secure activity history log with IP tracking to prevent unauthorized data changes and ensure transparency.

PHILRADS Asset Database System Feb 2026

Technologies: PHP, Bootstrap, JavaScript — Built during OJT at PHILRADS

- Web-based asset tracker with maintenance logs, staff approval workflow, QR code labeling, and role access tiers.
- Generated easy-to-read inventory and depreciation reports with simple CSV export options for the management team.

KIDDY TRACK – Lead Programmer August 2023 – June 2026

Web-Based System for Streamlining Student Academic Performance for Teacher & Parent Monitoring

Technologies: PHP, MySQL, HTML, CSS, JavaScript, Python

- Led full-stack development: database schema, teacher/parent dashboards, and academic data reporting modules.
- Applied systems analysis principles; implemented secure, role-based monitoring for educational stakeholders.

EDUCATION

BS Information Systems 2022 – 2026

Catanduanes State University

Senior High School — TVL/ICT Track 2017 – 2019

Catanduanes Colleges

CERTIFICATIONS & SKILLS

Skills:

- Web Development & Databases: PHP, MySQL, JavaScript, HTML5, CSS3, Bootstrap, Apache
- Systems & Tools: Git/GitHub, Power BI, QR Code Systems, REST APIs
- Core Competencies: Systems Analysis, Requirements Gathering, Data Entry & Reporting, Technical Documentation
- Soft Skills: Project Leadership, Cross-department Collaboration, Time Management, Problem Solving

Certificates:

- OJT Completion — PHILRADS, Operations & Admin Dept. (462 hrs), 2026
- Power BI Dashboard: Zero to Low Code — DataSense Analytics, 2026
- Webinar — From Manual to Algorithmic: Disaster Relief with Data, 2026
- DOLE Certificate of Eligibility — Government Internship Program (GIP), 2023
- HACK4GOV Capture the Flag — Participant, 2023
- Certificate of Loyalty — Catanduanes Colleges K-12 Program, 2019
